SUMMARY

Cloud & DevOps Engineer with hands-on experience in designing, automating, and deploying cloud-native infrastructure on AWS. Proficient in CI/CD pipeline implementation, containerization with Docker, orchestration using Kubernetes (EKS), Infrastructure as Code with Terraform, and monitoring using CloudWatch and Datadog. Strong foundation in Linux administration, cloud operations, and backend technologies, with a passion for automation and scalable system design.

TECHNICAL SKILLS

Cloud Platform: AWS (EC2, S3, IAM, VPC, EBS, EFS, ALB, Auto Scaling, RDS, CloudWatch, EKS)

CI/CD & DevOps Tools: Jenkins

Containerization & Orchestration: Docker, Docker Compose, Kubernetes

Infrastructure as Code (IaC): Terraform

Monitoring & Logging: Amazon CloudWatch, Datadog

Version Control: Git, GitHub

Operating Systems: Linux (Ubuntu, Amazon Linux), Windows

WORK EXPERIENCE

DevOps Intern | HisanLabs Pvt. Ltd., Pune

Nov 2025 – Jul 2026

- Designed and deployed scalable and highly available AWS infrastructure using EC2, VPC, IAM, Application Load Balancer, Auto Scaling, and S3.
- Built and automated CI/CD pipelines using Jenkins and GitHub, reducing manual deployment efforts by approximately 40%.
- Containerized applications using Docker and Docker Compose and deployed workloads on Kubernetes (Amazon EKS).
- Implemented Infrastructure as Code (IaC) using Terraform with reusable modules and remote state management for consistent and repeatable deployments.
- Monitored cloud infrastructure and applications using Amazon CloudWatch and Datadog; performed Linux administration and troubleshooting in production environments.

Software Developer | Y-SAAS Infotech Pune

Dec 2023 – Apr 2024

- Developed web applications using Java, Spring, JSP, HTML, and CSS
- Designed and managed backend functionality using MySQL database
- Collaborated with team members to build and deploy application features

PROJECTS

• Student Registration – DevOps Project

Built and deployed a DevOps application on **AWS using Terraform, Jenkins, Docker, and Kubernetes (EKS)**. Automated **CI/CD with Jenkins and SonarQube** and monitored infrastructure using **CloudWatch and Datadog**. Hosted frontend on **S3 + CloudFront** and integrated backend with **RDS (MySQL)**.

GitHub Repository: [Student-registrations](#)

• AWS Serverless Employee Management System

Built a serverless employee management application using **AWS Lambda, API Gateway, DynamoDB, S3 and IAM**. Implemented REST APIs for employee CRUD operations.

GitHub Repository: [Employee-Management-System-Serverless](#)

• AWS Resource Monitoring & Email Notification

Built an AWS monitoring system using **CloudTrail, EventBridge, Lambda, SNS and S3**. Automated AWS resource event monitoring and **email notifications**.

GitHub Repository: [AWS-Resource-Monitoring-and-Email-Notification](#)

• Registration System – CI/CD

Containerized the application using **Docker and Docker Compose** with OTP email verification.

Created **Jenkins CI/CD pipeline** and used Terraform for AWS infrastructure.

GitHub Repository: [Registration System – CI/CD](#)

EDUCATION

Master of Computer Applications - Vidya Pratishthan's Institute of Information Technology (VIIT), Baramati, (SPPU) 2022–25 | **CGPA: 7.8 / 10**

Bachelor of Computer Applications - M.S. Kakade College, Baramati, (SPPU)

2018–21 | **Percentage: 60%**
